

Maximize Your Oven's Potential with These Maintenance Tips

Lincoln Impinger Oven

Keeping your oven in top condition doesn't have to be a hassle. By performing regular maintenance, you can extend its lifespan and save yourself money in the long run. Following these daily and weekly cleaning steps will ensure that your Hunt Brothers® Pizza products are always mouth-watering, and your customers are always satisfied. Don't miss out on the opportunity to boost your profits by maximizing your oven's potential.

DAILY CLEANING

- ✓ Empty and clean the crumb tray.
- ✓ Clean the conveyor belt.
- ✓ Wipe the exterior with a cloth, then rinse it with clean water.

WEEKLY MAINTENANCE STEPS

1. Remove the following components: baffles, conveyor, end panels, finger panels, and air returns. **Move the fingers one section at a time!**
2. Clean both the oven's interior and the air intake on the exterior.
3. Clean the components using mild detergents, rinse them thoroughly, and dry them.
4. Apply the pretreatment oven coating.
5. Replace all components.
6. Clean the exterior of the oven.

DID YOU KNOW?

The #1 cause of electrical component failure is overheating caused by grease and dust. This can be prevented by wiping the air intakes on the front and back daily.
